

PRODUCT SPOTLIGHT: HANGARS

It's a bird! It's a plane! Whatever it is, Dean's got a hangar for it!

Dean hangars are the newest addition at **RD Air Services** in Gainesville, Fla. Scherer Construction of North Florida recently finished constructing the project. The hangars feature 100' wide by 28' tall bottom rolling slide doors, as shown above. These doors are supported by flying outriggers.

An aerial view of RD Air Services' new hangars

Fasterco Construction recently completed work on **Marion County BOCC's** two new Dean hangars in Dunnellon, Fla. The hangars, shown below, feature Dean's own 10-unit bottom rolling slide doors. Each hangar door contains a 3070 pilot door. Almond Kynar finish was used on the roof.

From Mr. Dean's Desk:

Hangars have always been a fun project for us at Dean. Our hangars are designed by pilots for pilots. As a pilot of more than 50 years, I put much thought into our hangars' practicality. I wouldn't store my planes in anything else. Not only do Dean hangars look great and stand out at airfields, they will protect your aircraft for years to come.

Sunrise Aviation of Ormond Beach Fla., has three new Dean hangars. JH Merrell Construction recently completed work on the hangars. Each hangar has a different kind of door and capacity to suit different needs. One hangar has a 19-unit bottom rolling slide door, while another has a 14-unit bottom rolling slide door. The third hangar is a 4-unit bulk hangar with upswing doors.

OCTOBER BIRTHDAYS

Warm wishes to everyone celebrating birthdays this month!

October 3:
Gerardo Araiza, Fort Myers

October 7:
Heather Cook, Cedartown

October 10:
Wallace Brooks, Thomasville

October 13:
Rafreilly Curiel, Fort Myers
