## STEEL BUILDINGS, INC.

### THE DEAN COLOR SYSTEM DURASTAR® SMP

The Dean Color System is based on a high content silicone modified polyester coating over a superior primer system. The pre-coated panels are produced under a strict quality assurance program that requires recorded physical test data on each pre-coated coil.

DURASTAR® silicone modified polyester coil coatings are designed for a two-coat application on properly cleaned and pretreated steel substrates. DURASTAR® SMP coatings offer superior performance in harsh environments. It is engineered with a proprietary resin technology and an innovative formulation process. DURASTAR® SMP coatings outperform other silicone-polyester coatings for resistance to chalk, fade, corrosion and moisture and are available with up to a 40-year limited warranty. The system cleans easily, has excellent stain resistance and can be recoated.

Please see [www.DeanSteelBuildings.com](http://www.DeanSteelBuildings.com) for the latest information on our finishes, color selection availability by panel profile, and warranty information.

POLAR WHITE (PW) 26 & 24 ga

OYSTER WHITE (WH) 26 & 24 ga

ASH GREY (AS) 26 ga only

LIGHT STONE (LS) 26 & 24 ga

SAHARA TAN (ST) 26 & 24 ga

BURNISHED BRONZE (BR) 26 ga only

COLONY GREEN (GR) 26 ga only

FERN GREEN (FG) 26 ga only

HAWAIIAN BLUE (BL) 26 & 24 ga
